SUMARRY

Highly motivated and detail-oriented aspiring web developer with a solid understanding of programming in Python and Java, and experience using the Django framework. Currently studying BSc (Hons) Computing at Itahari International College. Built an e-commerce website and worked on projects related to databases and cloud computing. Eager to keep learning and use my skills to create useful and real-world software solutions.

PROJECTS

- **E-commerce Website (Django/Python):** Developed a comprehensive e-commerce platform featuring product catalogs, shopping cart functionality, user authentication, and secure payment processing. Utilized Django framework for robust backend development and Python for efficient scripting and data handling.
- **PetPal – Pet Adoption System (Java, JSP, MySQL, and MVC Architecture):** Led the development of a dynamic web-based application for managing pet adoption processes. The system features user registration, pet listings, adoption request management, and an administrative dashboard for shelter staff.
- **Land rental system (Python)**

Developed a land rental management application designed to streamline the process of leasing agricultural or commercial land. The system enables users to manage land listings, tenant details, lease agreements, and automated invoice generation.
